

**HIPPOCRATES Prospective
Observational Study (HPOS)**

Are you living with PSORIASIS and want to participate in research?

We invite you to share your experiences in this study!

Up to one-third of people living with psoriasis will develop a related arthritis causing inflammation in the joints and tendons.

HPOS is a study of people living with psoriasis. Led by patient research partners, a research team at University of Oxford and University College Dublin we are aiming to identify people at risk of developing psoriatic arthritis.

The HPOS is part of a large research project called HIPPOCRATES, investigating psoriasis arthritis across Europe.

We want to identify which people living with psoriasis will develop arthritis with the long-term aim of trying to prevent the development of arthritis before it occurs.

YOU ARE ELIGIBLE IF YOU ARE

... an adult living in Europe with psoriasis
... are not diagnosed with psoriatic arthritis

**WITH YOUR HELP, WE CAN ADVANCE
MEDICINE AND IMPROVE LONG-TERM
QUALITY OF LIFE FOR PEOPLE LIVING
WITH PSORIASIS.**
